

Sudi David

Full-Stack Software Engineer

contact@sudi.dev · +243 817 334 881 · github.com/SudiDav · sudi.dev/blog · DRC

Full-Stack Software Engineer with 9+ years of experience building high-performance, scalable backend systems. Proven track record delivering end-to-end solutions across fintech, edtech, and enterprise domains. Skilled in leading distributed teams, mentoring junior developers, and turning complex technical challenges into reliable, production-ready software.

WORK EXPERIENCE

Senior Software Engineer

May 2026 — Present

[Almafrica](#)

- Architected and designed the mobile app, frontend, and backend of a platform helping farmers join the world of tech ([almafrica.com](#)).
- Leading a team of developers and mentoring junior engineers.

FullStack Engineer

Feb 2024 — Apr 2026

[IST Africa](#) · Remote, Denmark

- Spearheaded the redevelopment of a comprehensive school management system tailored for Danish schools, starting with the Absence module.
- Coordinated effectively with distributed teams across different regions, ensuring smooth communication and project delivery.
- Utilized modern technologies and frameworks to deliver a high-performance, future-proof school management system.

FullStack Engineer

Feb 2021 — Jan 2024

[Altech Group](#) · DRC (Hybrid)

- Managed a team of 4 developers and collaborated with different departments on the integration of a loan asset management system, successfully launched.
- Improved business processes by integrating third-party solutions like Spark Energy and Omnivoltaic.
- Worked with the finance team to streamline workloads by integrating the Xero and Telerivet APIs, helping both customers and the finance team.

FullStack Engineer

Apr 2018 — Dec 2019

[Fintech Group](#) · Uganda

- Built a reporting system for AB Bank integrated into CHEQUEPOINT, reducing paperwork on the user's side by 70%.
- Automated file generation at NCBA bank from the CHEQUEPOINT system to the core banking system.
- Reduced hands-on financial reconciliations by integrating a web service to check account balances from the core banking system.

FullStack Engineer

Feb 2017 — Mar 2018

[Fintech Group](#) · Uganda

- Integrated the central bank system with various banks through CHEQUEPOINT, a web application bridging local banks and the central bank.
- Migrated the legacy system to MSSQL and ASP.NET web forms and web services, helping users work confidently with 85% fewer errors.

EDUCATION

Sikkim Manipal University — Degree in Science of Information Technology

Kampala, Uganda · 2013 — 2017 · Top 10% of my class

PROJECT

Auction Car Web App — Microservices .NET web application built with RabbitMQ, Docker, and Kubernetes.

TECHNOLOGIES

Stack: .NET C#, ASP.NET Core, TypeScript, NodeJS, NestJS, React, Vue, Entity Framework Core, TypeORM, Mongoose

Other: SQL Server, MongoDB, PostgreSQL, RabbitMQ, AWS (EC2, S3), REST API, GraphQL, DigitalOcean, Nginx, Traefik, Docker, Docker Swarm, Bash, JIRA, Cloudflare, GitHub Actions, Jenkins, OpenTelemetry, Datadog, Sentry, Microservices Architecture

AWARDS

Facebook Developer Challenge (2018) — Built JusticeBot, a chatbot that provides legal procedure information in a simplified manner and connects users with legal service providers for free.
